Report

As the officials in charge of plague camp are occupying these buildings, it is considered advisable to have the floor of some of the important buildings named overleaf to be floored with Mangalore clay tiles (set in mortar, and pointed with cement). This will be a great improvement as these buildings are meant for the accupation of people suffering from epidemic diseases and officials in charge of them. The remaining buildings can be floored with tiles, similarly, eventually, as funds permit.

Of late as there have been burglaries committed in these buildings, some of the windows are now estimated to be provided with Ironbars.
